AMERICAN EDITION

LNE—the magazine for skin care and spa professionals

November 2005

\$7.50

Warm glow, cool shimmer

Most professionals celebrate the season change with a change of color. **Aveda** recently presented its **Holiday 2005 Face Color Collection**, which "excites the senses" with the warm glow and cool shimmer of nature-inspired colors, says Aveda. The collection includes the Lip Tint SPF 15, Lip Color Concentrate SPF 15, Refillable Lip Color Case, Lip Glaze, Face Accent, Eye Definer, Eye Color Singles and Duos. For more information, call 1-(800) 328-0849 or visit www.aveda.com.

Setting spray

Makeup should stay put. **Regal Beauty, Inc.**, says its **Model in a Bottle** is a one-of-a-kind, matte-finish, makeup-setting spray that holds foundation and eye makeup in place throughout the day and night. The product eliminates the need for periodic touchups and reapplications, says the company. For more information, visit the website, www.modelinabottle.com.

Lip color for the millennium

To turn up the temperature, most women go for their favorite lipstick color—red. **Three Custom Color Specialists** recently presented **A Century in Red Lip Color Palette**, a collection of various shades of red that celebrates the beautiful women of the 20th century, says the company. The product is packaged in a slim, gunmetal case with a mirror and lip brush, says the company. For more information, call 1-(888) 262-7714 or visit www.threecustom.com.

Unique Spotaway Technique

Advanced treatment for removal of brown spots, freckles and benign moles

Simple

Remove the epidermis above a spot and apply Spotaway on the spot area only. Leave on for 8-12 hours.

Effective

A spot may be removed completely and usually won't come back.

Quick

A treatment usually takes just a few minutes. Spots will peel off in 3-5 days. Several spots can be treated at the same time.

Low cost

A Spotaway bottle can treat a few hundred small spots.
